Abstract

The International Conference on Smart Educational Technologies and Advanced Computer Science provides an interdisciplinary forum for researchers, academicians, and industry practitioners to present and discuss recent innovations in education and computing. The conference focuses on smart learning environments, intelligent educational systems, and advanced computer science techniques that support effective teaching, learning, and knowledge management. It highlights the application of emerging technologies such as artificial intelligence, machine learning, Internet of Things (IoT), cloud computing, and data analytics in transforming education. The conference aims to foster collaboration and innovation for developing next-generation smart education solutions and advanced computational systems.

Keywords: Smart Educational Technologies, Advanced Computer Science, Artificial Intelligence, Machine Learning, Internet of Things (IoT), Cloud Computing, Data Analytics, Smart Learning Systems, Digital Education, Intelligent Systems
