

International Conference on Transforming India into a Global Education Hub through Technology Integration and Yoga-Based Holistic Learning

Nitin Kumar, Assistant Professor (Yoga), S.V. Jain College, Bhadra (Rajasthan)

Abstract

This conference explores India's evolving role as a global education hub by integrating advanced educational technologies with yoga-based holistic learning approaches. It highlights how digital tools such as artificial intelligence, e-learning platforms, and smart classrooms can enhance academic quality, accessibility, and innovation. Alongside technological advancement, the inclusion of yoga-based education promotes physical well-being, mental balance, and value-based learning. The conference aims to bring together educators, researchers, and policymakers to discuss strategies for creating a balanced, innovative, and globally competitive education system in India.
